Weekly Maintenance

AVG 2011 Free Edition – Automatic

Automatically runs & updates. Be careful with all emails, don't open anything suspicious.

To run AVG 2011 - Manually if needed

1. Open AVG 2011 – Double Click the icon on the desktop.
2. Updating AVG 2011 – Click the **Update Now** button.
3. Running a Scan – Click the **Scan Now** button.

With the free version on AVG, IF you miss updates for more than 2 days you will need to manually update.

YOU CAN PURCHASE A 2 YEAR LICENCE for AVG 2011 ANTI VIRUS FOR \$66.50, WHICH WILL DO THESE UPDATES FOR YOU, EVEN IF YOU MISS THEM!!!!

(Just ring us we will sort it out for you)

MALWAREBYTES (Need to update and scan manually weekly)

1. Open Malwarebytes – Double Click the icon on the desktop.
2. Updating – Click the **Update** tab, **check for Updates**.
3. Running a Scan – Click the **Scanner** tab, then Highlight **Perform Full Scan**, Click **Scan**

Defrag - Windows XP (Once a month)

Vista and Win7 do this automatically for you

It is recommended to do a **Defrag** every month – Organises your files and makes access to them faster

To perform a defrag

1. Open the disk Defrag – Click **Start > Programs > Accessories > System Tools > Disk Defragmenter**.
2. Run the Defrag – Select the volume you wish to Defrag, eg (C) and then click **Defragment**
